The annual ACM SIGMOD conference is a leading international forum for database researchers, practitioners, developers, and users to explore cutting-edge ideas and results, and to exchange techniques, tools, and experiences.

ACM SIGMOD’14 solicits submissions for the programs and events listed below:

- research papers,
- technical demonstrations,
- industrial papers,
- tutorials,
- panels, and
- undergraduate research papers.

We invite the submission of original contributions relating to all aspects of data management defined broadly, and particularly encourage submissions on topics of emerging interest in the research and development communities.

Proposals for accompanying workshops are also solicited on topics that demand dedicated coverage due to their relevance to current data management research and development. The program will also include industrial exhibits, a New Researcher symposium, and keynote talks by leaders in academia and industry.

All aspects of the submission and notification process will be handled electronically. The call for papers and detailed submission information will be available at [http://www.sigmod.org/2014/](http://www.sigmod.org/2014/)

The conference will be held at the Snowbird Ski & Summer Resort. This world-class hotel resort is minutes from downtown Salt Lake City and offers a secluded and beautiful mountain-based conference venue and adventure.

Snowbird promises magnificent mountains, amazing canyons, and a breathtaking setting. Adjacent to Salt Lake City, a major city in the western United States, many attractions, parks, and recreational areas — including the Yellowstone, Zion, Bryce Canyon, Arches, and Capitol Reef national parks — are within a short distance.
